

Smart Tracking Data Network for Shipment by Inland Waterway **WORKSHOP**

Join the ST4W Consortium for a workshop on the 20th February
2019 in Liverpool John Moores University, UK,
from 10am until 1.30pm

This workshop is part of a series aimed at determining industrial needs, requirements and limitations of current Inland Waterways practices in the UK.

We address the following topics:

- Raising the awareness of the potential of inland navigation in the UK
- Current policies in the UK IW sector
- Future improvements and technological advancements

A great opportunity to network and to create awareness of the competitive advantages that UK inland waterways can offer compared to other modes of transport!

1. Confirm attendance via Gergana.zaharieva@inlecomsystems.com
2. No registration fee for workshop participants

ST4W ...

proposes a management solution for shipment by inland waterway transport, providing to SMEs a simpler and cheaper access to secure data, and enabling them to share a hierarchical track & trace service of shipment, complementing the RIS
